Question:

Find the direction cosines of a line which makes equal angles with the coordinate axes

Solution:

Symbol	Description
A	direction vector of line
B	unit vector in direction of line

TABLE 0: Variables Used

A vector which subtends equal angles to all axes will have equal components. Let

$$\mathbf{A} = \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} \quad (1)$$

$$\|\mathbf{A}\| = \sqrt{\mathbf{A}^\top \mathbf{A}} \quad (2)$$

$$= \sqrt{\begin{pmatrix} 1 & 1 & 1 \end{pmatrix} \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix}} \quad (3)$$

$$\Rightarrow \|\mathbf{A}\| = \sqrt{3} \quad (4)$$

The unit direction vector of the line is

$$\frac{\mathbf{A}}{\|\mathbf{A}\|} = \frac{1}{\sqrt{3}} \begin{pmatrix} 1 \\ 1 \\ 1 \end{pmatrix} = \begin{pmatrix} \frac{1}{\sqrt{3}} \\ \frac{1}{\sqrt{3}} \\ \frac{1}{\sqrt{3}} \end{pmatrix} \quad (5)$$

$$\mathbf{B} = \frac{\mathbf{A}}{\|\mathbf{A}\|} \quad (6)$$

$$\mathbf{B} = \begin{pmatrix} \frac{1}{\sqrt{3}} \\ \frac{1}{\sqrt{3}} \\ \frac{1}{\sqrt{3}} \end{pmatrix} \quad (7)$$

Hence, the direction cosines of the line are $\frac{1}{\sqrt{3}}$, $\frac{1}{\sqrt{3}}$ and $\frac{1}{\sqrt{3}}$.
