Question:

Find the direction and normal vectors of the given line  $x + y = 0$

Variable	Description
<b>m</b>	Direction vector
<b>n</b>	Normal vector
<b>h</b>	Intercept vector
<b>x</b>	Vector which represents points on the line

TABLE I: Variables Used

**Solution:** The normal can be vector found out as

$$x + y = 0 \quad (1)$$

$$\begin{pmatrix} 1 & 1 \end{pmatrix} \mathbf{x} = 0 \quad (2)$$

$$\mathbf{n} = \begin{pmatrix} 1 \\ 1 \end{pmatrix} \quad (3)$$

The direction vector can be found out as

$$x = x \quad (4)$$

$$y = -x \quad (5)$$

$$\mathbf{x} = x \begin{pmatrix} 1 \\ -1 \end{pmatrix} + \begin{pmatrix} 0 \\ 0 \end{pmatrix} \quad (6)$$

$$\mathbf{x} = k \begin{pmatrix} 1 \\ -1 \end{pmatrix} \quad (7)$$

Direction vector:  $\mathbf{m} = \begin{pmatrix} 1 \\ -1 \end{pmatrix}$

Normal vector:  $\mathbf{n} = \begin{pmatrix} 1 \\ 1 \end{pmatrix}$
